

Sometimes a country changes its local currency. In this case local bank transactions should be in national currency before the change date, and in the new currency after. For example, Latvia joined Eurozone in January 1, 2014 and changed it's currency from Lats (LVL) to Euro (EUR).

Which of the following transactions are consistent with the above information?

Date	Currency	Amount	Transaction comments
02/04/2011	LVL	-20	ATM withdrawal
13/11/2013	LVL	-128.34	bill 281904-182
31/12/2013	EUR	-50	ATM withdrawal
13/01/2014	EUR	-100	ATM withdrawal
